The Elliott School Undergraduate Scholars program is an enhanced independent research experience for a select group of Elliott School juniors and seniors. It builds upon the standard Elliott School Independent Study and Senior Thesis models and includes additional funding, as well as faculty and peer support. Highlights of the program include:

- **One-credit Pass/No Pass course in the fall** (Thursdays, 10:00 am – 12:00 pm) The course focuses on research methods, and supports students in writing a preliminary draft of the research paper.
- **Three-credit graded Writing in the Disciplines (WID) course in the spring** (Thursdays, 10:00 am – 12:00 pm). The course focuses on receiving feedback from peers and faculty on the research paper drafts, and preparing the draft for submission to conferences, academic journals, or as a writing sample.
- Close work with a faculty advisor and the program director.
- **Research stipend of $100** to be used for research materials and expenses and to cover lunch with the faculty advisor; up to $1500 in additional funding available, subject to justification.
- **Peer support** throughout the research and writing process.
- Presentation of research at an on-campus research symposium in April.
- Support in submitting research papers to peer reviewed academic journals.
- Support in applying for research grants and scholarships.
- Support in preparing for or applying to graduate programs.

One of the goals of the program is to promote the student/faculty advisor relationship. As with the current Independent Study and Senior Thesis arrangements, the faculty advisor will have the following responsibilities:

- Sign the Student/Faculty Advisor Agreement.
- Review and complete CITI training modules if two or more years have passed since last training. Access is free with GW email login. Faculty advisors are considered Principal Investigators on student research, and CITI training is required in order to determine if research needs IRB approval.
- Work with student to determine if the student needs to seek IRB approval. The Office of Human Research offers a determination worksheet and a document on Considerations for Student Research to guide you if you’re unclear whether a student project will require additional review.
- Meet with the student regularly during the year. The frequency of these meetings is to be determined by the student and faculty advisor.
- Inform the program director at the end of the fall semester as to whether the student has made sufficient progress and will be in the position to complete a rough draft by the beginning of the spring semester. This information will be used to determine the student’s grade (P/NP) for the fall course.
- Review the student’s research paper and submit a grade at the end of the year. The program director might confer with the faculty advisor regarding the final grade. Students are expected to attend program-related sessions and will be penalized for failing to participate. Faculty advisors will set individual paper due dates, which must fall by the last day of the spring final examination period (May 14, 2019). The Elliott School will send a grade request to the faculty advisor at the end of the spring semester and will report the grade to the Registrar.

In order to foster the relationship between student and faculty advisor, deepen the student's engagement with the material, and maximize the quality of the research produced, faculty advisors are also asked to:

- Go out to lunch with the student once during the 2018-2019 school year. The student’s stipend will cover the cost of this lunch.
- Attend the spring class session when the student will present his/her rough draft for peer feedback. Class meets on Thursdays from 10:00 am to 12:00 pm; schedule of peer feedback sessions TBA.
- Attend the final research symposium in April 2019. Exact dates and times TBA.
Elliott School Undergraduate Scholars Paper Requirements and Guidelines

• The student will conduct primary research for the paper.
• The paper topic must be international in scope.
• The paper length must be at least 30 pages (of text).
• The faculty advisor may be any full-time GW professor with knowledge of the student's research topic. In certain cases, willing part-time professors may be approved to serve as faculty advisors. The student will submit a petition for this policy exception with the program application.
• The student and faculty advisor should set deadlines early each semester to ensure the completion of the paper within the appropriate timeframe. The program syllabus also sets benchmarks and deadlines.
• Final paper grades are due by the end of the spring semester.
• If the student is using this project to satisfy an additional requirement, such as for the University Honors Program or a Special Honors requirement in another department, the student must also abide by all relevant policies and guidelines.

Student Name: ____________________________________________________________

GWid: _____________________________________________________________________

Working Title of Paper: ______________________________________________________

I, the applicant, understand the requirements of this program and am committed to its goals:

Student Signature: __________________________________________________________

Date: _____________________________________________________________________

Faculty Advisor Name: ______________________________________________________

Faculty Advisor Department: _________________________________________________

Faculty Advisor Email: ______________________________________________________

CITI Training: ☐ I underwent CITI training __________ (month/year).  or  ☐ I agree to undergo CITI training if the student is admitted into the program.

I, the faculty advisor, have discussed and approved the student's topic and proposal. I understand the requirements of this program and am committed to its goals:

Faculty Advisor Signature: _________________________________________________

Date: _____________________________________________________________________
